*Community Website Mobile App*

New Year, New Version!
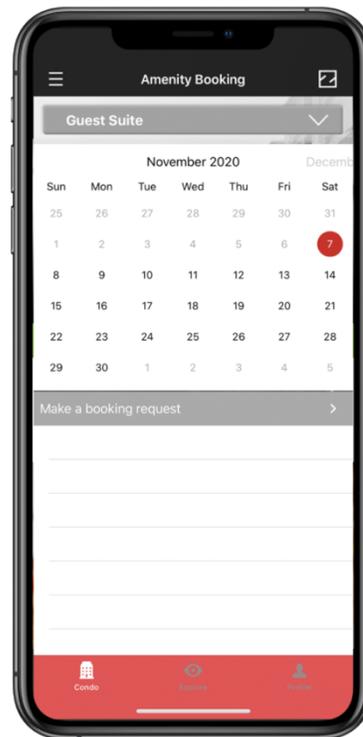

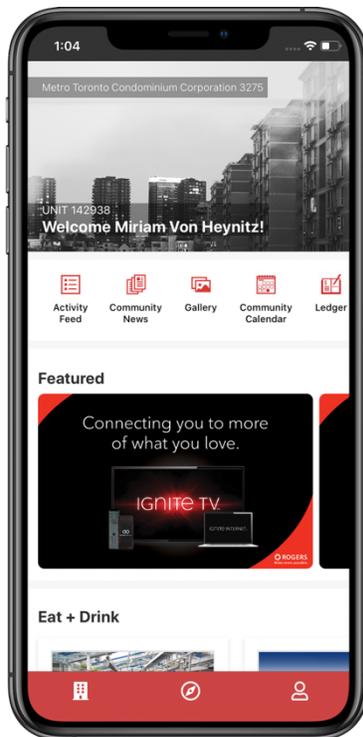

We are excited to announce the release of a new updated version of the FREE Mobile app that is an extension of the Shiftsuite's Community Website. This platform is especially important during these challenging times as we look for new contactless methods of communicating and interacting.

Benefits & Updates:

We have completely redesigned the platform to have a new modern look and make it easier and more intuitive for you to use, some of the new features include:

- **Amenity Bookings** - Residents now have the ability to book directly from their phones
- **Community Calendar** - View all community events
- **Financial Ledger** - Owners can view their financial account anytime, anywhere

This is in addition to the benefits already included of:
- **Push notifications** - Notify you directly to your mobile phones about anything going on in the building from cleaning the underground parking garage to testing the fire alarms
- **Community News** - A central resource to find out all the action happening in your condo
- **Contact your Property Manager** - Quick tool to contact your property manager by phone or email
- **Service Requests** - Book a service request, directly from your phone and get real-time updates as they work through your request
- **Document Library** - Owners gain even easier access to documents, forms and published information
- **Manage Profiles** – A tool to ensure all your information is up to date
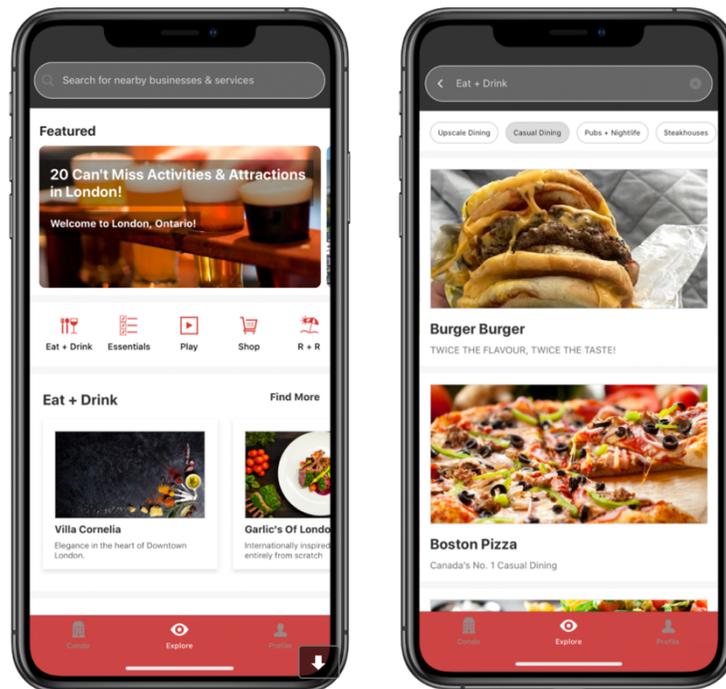

Explore Discounts and Offers:

In addition to the above, an exciting "Explore" section, where you benefit with exclusive promotions, discounts and offers from stores, restaurants and many other services in the neighbourhood as well as national brands. Best of all it is free!

We are looking for your continued help in promoting this app to neighbours and fellow owners/residents. By increasing the downloads and adoption, we are able to increase the quality of services offered on both the community and explore sides of the application.

We have a feedback section that we encourage you to use so that we can look to improve the platform to best suit your needs.
